

DECISION TABLE

System: [Testomatic](#);

Functional: Creating a project;

Conditions:

1. Project Title;
2. Repository URL with tests path;

True: T - Title is filled/URL inputted correctly;

False: F - Title isn't filled/ inputted invalid URL.

Conditions	Case 1	Case 2	Case 3	Case 4
Project Title	T	T	F	F
Repository URL with tests path	T	F	T	F
Output	Project created	Error message "Url is not a valid URL"	Tooltip with message "Please fill out this field"	Tooltip with message "Please fill out this field"

Case 3 and Case 4 have the same outputs. Therefore, we leave only one of them:

Conditions	Case 1	Case 2	Case 3
Project Title	T	T	F
Repository URL with tests path	T	F	T
Output	Project created	Error message "Url is not a valid URL"	Tooltip with message "Please fill out this field"
